

Assignment-11

Hands-on Assignment: Stock Prices Insights Generation

Assignment Availability: 25 Oct 2025, Saturday, 2:00 pm - 31 Oct 2025, Friday, 11:00 pm

Format: Hands-on Implementation and Document Submission

Total Points: Total points 3.

Points distribution:

- Successfully creating a GitHub repository and starting a Codespace using it (1 Point)
- Launching the Chainlit application interface and doing inference (1 Point)
- Committing the changes and submitting the GitHub repository link (1 Point)

Objective:

The primary objective of this assignment is to help learners explore how LLMs can be integrated with structured financial data, specifically focusing on the Nifty 50 companies. The assignment is designed to show how LLMs can automatically interpret user queries, generate SQL queries, and provide insights in a dynamic and automated way. The core goal is for learners to understand how LLMs can be effectively leveraged to interact with databases, generate insights, and simulate complex query-response flows.

Instructions:

1. First, go through the below notebooks
 - a. *NB_01_Leveraging_LLMs_for_Querying_Insights.ipynb*
This includes the project abstract, architecture, steps to create a SQLite database, and perform SQL query generation using an LLM.
 - b. *NB_02_Data_Loading_for_Querying_Insights.ipynb*
This includes the steps to load the data from pickle files, combine it, and store it in a SQLite database.
2. Then, follow the steps given in the document -
Steps for Stock Prices Insights Generation Application.pdf

This includes the complete steps and code to launch a Chainlit interface for the Stock Prices Insights Generation application.

Submission Instructions:

- Create a new document for this Assignment.
 - Perform the steps given in the document -
Steps for Stock Prices Insights Generation Application.pdf
 - Add snapshots of your GitHub repository being created, GitHub Codespace running the chainlit interface, and inference with the application.
 - Also, add your GitHub repository link in the document.
 - Submit your assignment document on the LMS.
-
